 - 46 justice which cannot be achieved in any other means.
- 47
- 48 3. The Board of Adjustment may grant a special exception from the provisions of this

Sec 42.260 Planned Unit Development Overlay Districts (PUD)

1. A PUD Overlay District is intended to serve as an alternative zoning to allow for more flexible, creative, or a mixture of uses that would otherwise be difficult or impossible with the zoning options offered in this chapter. A PUD Overlay District is specifically not intended to allow for the circumvention of zoning or land use requirements.
2. The approval of a PUD District shall constitute an amendment to the zoning ordinance to add an overlay district concurrent with the underlying zoning. The PUD overlay supersedes the underlying zoning district use, other development requirements, and bulk standards as outlined in the approved site plan, conditions of approval, and PUD report. Such property shall for zoning purposes be identified as a PUD Overlay on the zoning map.
3. The underlying zoning must be rezoned to the district that most closely matches the PUD Overlay District use areas indicated on the site plan. If not already properly zoned, the rezoning must occur concurrently with the PUD Overlay District approval ordinance.
4. A PUD Overlay District, once approved, remains in effect for a period of ten (10) years unless specifically approved for a longer period or extended by the Planning and Zoning Commission before expiration.
5. After the PUD Overlay District expires, the property reverts to underlying zoning. Any development is considered to be a conforming use, however, any subsequent development or redevelopment of the property must adhere to the standards of the applicable zoning district.
6. No PUD Overlay District may be considered for a property less than two (2) acres in size.
7. Approval of a PUD should promote the following goals:
 - a. Implementation of the Rolla Comprehensive Plan.
 - b. Efficient use of land that will protect and preserve, where possible, natural features of the land such as mature trees, streams, and topographic features.
 - c. Harmonious and coherent site and building design that create a sense of place.
 - d. Direction of development to areas where existing public transportation facilities, utilities, and public services are adequate; provided that the applicant may make provision for such facilities or utilities which are not presently available.
8. Review of a PUD Overlay District may consider the location of the property, scale of the development relative to the vicinity, mitigation measures, impacts to utilities and streets, and public safety. Conditions may be imposed to limit the allowed uses, limit building size, limit height, increase setbacks, impose landscaping and buffering, limit signage, limit density, address traffic concerns, require public improvements to mitigate impacts, require open space or existing features to be

1 preserved, and any condition necessary to mitigate impacts to surrounding
2 properties.

Section 330 Landscaping, Screening, and Buffer yards

Sec 42.330 Landscaping, Screening, and Buffer yards

1. To encourage the most appropriate land use and protect the privacy and property values of adjacent permitted uses, regulations are prescribed herein for the location and type of various screening devices to be used when required by this Division.
2. These regulations provide standards and criteria for landscaping in all new construction projects which are intended to enhance the value of property, provide buffers between dissimilar uses, improve the physical appearance of the City and maintain an ecological balance. Landscaping and buffer-yards are intended to lessen the adverse impacts of more intense land uses when they are adjacent to less intense uses.
3. Property owners shall be responsible for maintaining the required screening materials in a neat and orderly manner at all times. Plant materials which die shall be replaced with healthy plant materials of similar variety and meeting the size requirements of this Section.

Sec 42.331 Parking Lot Screening

1. Where an open off-street parking area for any use contains five (5) or more off street parking spaces and is adjacent to an R-1, U-R, or R-2 District, a screening fence, berm, or evergreen hedge of a minimum of four (4) feet in height is required to screen the off street parking area from the adjacent residential district.
2. Where an open off-street parking area for a non-residential use is in or adjacent to any residential district, a screening fence, berm, or evergreen hedge of a minimum of four (4) feet in height is required to screen the parking area from the adjacent residential district.

Sec 42.332 Parking Lot Landscaping

The interior and perimeter of parking lots shall be landscaped in accordance with the following criteria. Lots of one (1) acre or less shall be exempted from this regulation as are parking areas which are located under, on, or within buildings, and parking garage structures.

1. Development sites containing parking areas totaling 100 or more parking spaces shall provide a minimum landscape area of ten (10) square feet per parking space for planting islands or strips within or adjacent to the parking lot Additional requirements include:
 - a. All landscape areas shall be protected from vehicular encroachment or overhang through appropriate wheel stops or curbs;
 - b. There shall be a minimum of two (2) under-story trees or one (1) canopy tree planted for each thirty (30) parking spaces, or fraction thereof; and
 - c. Interior parking areas shall contain planting islands or strips located so as to best relieve the expense of paving. Interior planting areas shall be a minimum of one-hundred (100) square feet for each under-story tree and two-hundred (200) square feet for each canopy tree dimensioned in such a way as to provide a suitable area for planting. Planting strips must have a minimum width of five (5) feet.

- 1 2. Perimeter landscaping shall be provided where a parking lot is within twenty (20)
- 2 feet of a public right-of-way line or residential district and there is not an
- 3 intervening building. Whenever a parking lot abuts a public right-of-way, a
- 4 perimeter landscape area of at least five (5) feet in depth shall be maintained on
- 5 private property and may include any required setback area. All necessary access
- 6 ways shall be permitted through all such landscaping areas. Whenever a parking lot
- 7 abuts a residential district the parking lot must be screened either by a privacy
- 8 fence, berm, or hedge to a height of six (6) feet. Landscaping must include a
- 9 minimum of 4 canopy, understory, or evergreen trees for each 100 feet.

- 15
- 16 2. A landscaped earthen berm of at least six (6) feet in height may be used to satisfy
- 17 screening requirements.
- 18
- 19 3. An evergreen hedge may be used if the shrubs or trees measure at least four (4)
- 20 feet in height at the time of planting and are of a species which has a mature height
- 21 of at least six (6) feet in height and form a continuous, solid, visual screen.
- 22
- 23 4. Existing trees and vegetation may be retained to fully or partially satisfy the
- 24 screening requirements if approved by the Development Services Director. Such
- 25 screening area must be a minimum of twenty (20) feet in width.
- 26
- 27 5. Landscape buffers and landscape areas must be planted with grass, shrubbery,
- 28 trees, and/or other ornamental vegetation. The use of gravel or rocks is permitted
- 29 for ornamentation, but may not constitute more than 25% of the landscape area.
- 30
- 31 6. Strict compliance with these landscaping requirements shall not be required if it
- 32 would cause visibility obstructions, particularly at intersections.
- 33
- 34 7. Plantings in utility easements shall be limited to ornamental or under-story trees,
- 35 shrubs and hedges. In this instance, each required canopy tree shall be replaced
- 36 with two (2) ornamental or under-story trees to reduce conflicts with overhead
- 37 utilities. Plantings in or adjacent to a utility easement shall be coordinated with the
- 38 effected utility company.
- 39
- 40 8. Potted plants or other forms of decoration may be considered to replace or reduce
- 41 the landscaping and buffering requirements on a case-by-case basis if compliance
- 42 with the requirements is impractical due to existing site conditions.
- 43

44 **Sec 42.334 Required Screening**

- 45 1. The City may require screening and fencing up to seven (7) feet in height for
- 46 outside storage and display areas in non-residential districts in addition to or in lieu
- 47 of the requirements of this section to effectively mask the specified area.
- 48
- 49 2. Dumpsters which may be visible from the adjacent residential property lines or
- 50 streets shall be visually screened by a solid fence or wall, not less than the height of
- 51 the refuse storage containers, on all sides.

Sec 42.335 Buffer-yards

1. Buffer-yards shall be required as shown on the Table of Buffer-yard Requirements. A buffer-yard shall be provided for a proposed development when it will be located in a zoning district listed in the left-most column of the table and the development is adjacent to a zoning district listed across the top of the table.
2. Buffer-yards are not required if there is an intervening public street between the districts with a right-of-way width of fifty (50) feet or more or if a railroad right-of-way separates the two districts.
3. All or a portion of the buffer-yard requirements may be waived if only a portion of a property is developed and the developed area is greater than fifty (50) feet from the adjacent property.
4. All or a portion of a buffer-yard may be used to satisfy a required setback, but in no instance shall parking spaces or outside storage/display be permitted in a buffer-yard.
5. Buffer-yards are defined in terms of the number of plant units required for each one-hundred (100) linear feet. The number of plant materials required shall be rounded up when a fraction is calculated.
6. The minimum buffer-yard width may be reduced by fifty (50) percent if the property owner elects to install a six (6) foot solid wood fence, a six (6) foot solid masonry/brick wall or a six (6) foot solid evergreen hedge for buffer yards A, B, C, and D. The fence may be reduced to four feet in the front setback to comply with the fence regulations.
7. Buffer yard C and D also require the installation of a six (6) foot solid wood fence, a six (6) foot solid masonry/brick wall or a six (6) foot solid evergreen hedge. The required evergreen trees and half of the shrubs must be planted between the fence and the adjacent property. The fence may be set back from the property line to allow adequate space for landscaping.

Sec. 42.349 Non-Conforming Signs.

Nonconforming signs are signs that do not conform to this section, yet were legally established prior to the adoption of this section. The burden of proof will be on the property owner to show that the sign was legally established. Nonconforming signs may continue to exist after passage of this section if they maintain their nonconforming status. Nonconforming signs are permitted to be removed and/or changed in accordance with the provisions of this Section:

- a. Permanent signs and sign structures that are moved, removed, replaced, or structurally altered must be brought into conformance with the sign regulations. However, nonconforming signs required to be moved because of public right-of-way improvements may be reestablished. Removable faces or sign panel inserts in a cabinet style sign may also be changed.
- b. Once a sign is altered to conform or is replaced with a conforming sign, the nonconforming rights for that sign are lost and a nonconforming sign may not be reestablished.
- c. When a sign or sign structure is removed or intentionally destroyed, replacement signs and sign structures must comply with the current standards. However, if a sign or sign structure that has nonconforming elements is partially or totally damaged by fire or other causes beyond the control of the owner, the sign and sign structure may be rebuilt to the same size and height using the same materials.
- d. Once a sign loses its nonconforming status, it must be removed before any other permits for signs shall be issued for the premises on which the sign that has lost its nonconforming status exists.
- e. A sign may be replaced if the structure is in danger of an imminent failure which would cause danger to the general public, as determined by a structural engineer.

2

3 **Sec. 42.350 Design Requirements**

4 The following design requirements are intended to better help new buildings and
5 development to be compatible with the existing surrounding properties in order to
6 maintain property values and provide improved aesthetics.

7

8 **Sec. 42.351 Townhouse Design Requirements**

9 Buildings designed as Townhouses are subject to the following design requirements:

- 10 a. Buildings shall not exceed 8 units in length when fronting along a street;
- 11 b. At least every 60 linear feet, wall or roof planes shall contain offsets or setbacks of
12 at least two (2) feet or by providing a front porch for each unit with a minimum
13 depth of five (5) feet and a minimum width of eight (8) feet.
- 14 c. A change in texture, material or the use of architectural features to differentiate
15 individual units to ensure that buildings have a multi-faceted exterior in which
16 building fronts are combined with window and door placements as well as other
17 architectural details, such as the use of dormers, gabled roof front stoops, flower
18 boxes, and or shutters may be used in-lieu of 2 above.

1 **Sec 42.360 Development Requirements**

2 3 **Sec. 42.360 Development Requirements.**

4 The following development requirements apply to all new development and
5 redevelopment of property. General development requirements are intended to provide
6 for orderly, predictable, and attractive development within the city.
7

8 **Sec. 42.361 Sidewalks.**

- 9 1. Required. Sidewalks are required in the following circumstances. The sidewalk must
10 be constructed to the minimum width stated.
 - 11 a. Sidewalks shall be required on both sides of the street on arterial and collector
12 status streets as designated by the adopted Major Thoroughfare Plan. Such
13 sidewalks shall be a minimum of 5 feet in width.
 - 14 b. Sidewalks shall be required on both sides of the street adjacent to any property
15 within the C-C, Center City district. Such sidewalks shall be a minimum of 10
16 feet in width. In instances where the distance between the right-of-way line
17 and the edge of the pavement is less than 10 feet, the sidewalk shall be as wide
18 as possible.
 - 19 c. Sidewalks shall be required on both sides of the street adjacent to any property
20 within the R-3, Multi-family; R-4, Urban; P, Public; C-1, Neighborhood
21 Commercial; and C-2, General Commercial zoning districts. Such sidewalks shall
22 be a minimum of 5 feet in width.
 - 23 d. Sidewalks shall only be required on one side of the street for local streets as
24 identified in the adopted Major Thoroughfare Plan within the R-1, Single
25 Family; R-2, One and Two Family; and U-R, Urban Residential zoning districts.
26 Such sidewalk shall be a minimum of 5 feet in width. Such sidewalks shall be
27 located on the north or east side of the street unless an alternative location is
28 approved by an alternative sidewalk plan, PUD, or as determined by the
29 Community Development Director to avoid placement conflicts. In the event
30 that an adjoining property has a sidewalk, the sidewalk must be extended
31 across the frontage of the subject property unless waived by the Community
32 Development Director.
- 33
34 2. Not required. Sidewalks are not required or may be waived in the following
35 circumstances:
 - 36 a. Sidewalks are not required on cul-de-sacs less than 600 feet in length with 15
37 or fewer lots or dwelling units.
 - 38 b. Sidewalks are not required on local streets adjacent to the M, Manufacturing
39 district.
 - 40 c. Sidewalks are not required along designated Interstate highways.
 - 41 d. Sidewalks may be waived by the Planning and Zoning Commission on local
42 streets in single-family residential large lot subdivisions. A large lot subdivision
43 shall be defined as a subdivision with all lots of greater than 25,000 sq. ft. in
44 area.
 - 45 e. Sidewalks are not required for the construction of a one or two family structure
46 in previously subdivided developments where both adjoining properties do not
47 have sidewalks.
 - 48 f. Sidewalks may be waived where only a portion of a property is developed or
49 redeveloped. In such case, sidewalks shall only be required adjacent to the
50 portions of the property which are developed or redeveloped as determined by

1 the Community Development Director. Sidewalks are not required for
2 development projects that do not require any driveway modification or on-site
3 concrete pavement.

- 4 g. In the event that an existing sidewalk in good condition abuts the subject
5 property, the Director of Public Works may waive the requirement to replace
6 the sidewalk, or may authorize modifications to enhance ADA compliance. In all
7 other situations, the existing sidewalk must be replaced with a compliant
8 sidewalk.
- 9 h. The Community Development Director may approve an alternative off-site
10 location for a sidewalk in lieu of a sidewalk along the subject property frontage
11 where such sidewalk would create enhanced pedestrian access to the
12 neighborhood. Cost estimates for the sidewalk must demonstrate that the
13 alternative location would be equal or greater in cost. Written authorization
14 must be provided from the adjacent property owners.
- 15 i. The Community Development Director may waive the requirement of providing
16 a sidewalk in locations which are determined to be impractical and unneeded,
17 such as sites which are more than 2,000 feet from the nearest existing sidewalk
18 and not needed as part of the trails network.
- 19 j. Sidewalks may be waived or required where an adopted neighborhood plan
20 includes a plan for the locations of needed sidewalks in the subject area.
- 21 k. The Board of Adjustment shall have the authority to waive the requirement for
22 sidewalks through the approval of a variance.

23
24 3. All commercial or multi-family development shall be provided with a designated
25 ADA accessible route through the site to a public sidewalk where a sidewalk exists
26 along an adjacent street. In such case that no public sidewalk exists, the
27 Community Development Director may require such accessible route to a point to
28 connect to a future or planned sidewalk.

29
30 4. Sidewalks shall be constructed to city standards and inspected and approved by the
31 Public Works Department, except that sidewalks constructed within the right-of-
32 way along MoDOT controlled roadways require approval, inspection, and
33 acceptance from MoDOT.

34
35 5. The City of Rolla may participate in the cost of construction of sidewalks to close
36 gaps in sidewalk connectivity, enhance ADA compliance, build wider sidewalks in
37 the center city or for trails as indicated in the adopted Trails Master Plan, and
38 construct pedestrian bridges or culverts to cross highways, railways, or waterways.

39
40 6. Encroachments or narrowing of sidewalks for short distances may be permitted to
41 allow for street trees, street signage, utility poles, utility meters, etc. In no case
42 shall an encroachment or narrowing of a sidewalk reduce the width to less than 4
43 feet or encroach for more than 4 consecutive feet along the length of the sidewalk.

44
45 **Sec. 42.362 Exterior Lighting Standards**

- 46 1. The purpose of this section is to regulate the spillover of light and glare on
47 operators of motor vehicles, pedestrians, and land uses in the proximity of the light
48 source. Safety considerations form the basis of these regulations pertaining to
49 motor vehicle use. In other cases, both the nuisance and hazard aspects will be
50 regulated. This section is not intended to apply to public street lighting, signs, or
51 seasonal displays.

- 1
2 2. The following standards are required of all exterior lighting, subject only to the
3 exemptions permitted in this section:
4 a. The light source or luminary for all exterior lighting shall have a cutoff so that
5 the bare light bulb, lamp or light source is completely shielded from the direct
6 view of an observer at ground level at the property line adjacent to property
7 within a residential zoning district.
8 b. No flickering or flashing lights shall be permitted.
9 c. A photometric study may be required to be submitted for non-residential
10 development which includes exterior lighting and is within or adjacent to a
11 residential zoning district to demonstrate compliance with this section.
12 d. Spillover light may not exceed 0.5 foot-candle onto adjacent property in the R-1
13 or R-2 districts; 2 foot-candle onto adjacent property in other residential
14 districts; or 5.0 foot-candle onto public streets.
15
16 3. The following exceptions apply to this section:
17 a. Outdoor Recreational Uses. Baseball diamonds, playing fields, and tennis courts
18 shall be exempt from the exterior lighting standards because of their unique
19 requirements for nighttime visibility and hours of operation.
20 b. Private Outdoor Lights. Private outdoor lights installed by a public utility on
21 private property for security purposes are exempt from the exterior lighting
22 standards provided the installation is approved by all property owners of
23 residential property from which the light source can be viewed.
24 c. In Manufacturing Zoning Districts. Due to unique lighting requirements for
25 some industrial or warehousing activities, exterior lighting shall be exempt
26 from exterior lighting standards, except for parking lot lighting.
27 d. Emergency Warning Lights. Safety signal and warning device lighting shall be
28 exempt from the exterior lighting standards of this Section.
29

30 **Sec. 42.363 Driveway Access**

- 31 1. All existing tracts of record are guaranteed at least one driveway to a public street
32 or right-of-way, either directly or by access easement.
33
34 2. On Collector streets, one driveway may be permitted for each one-hundred (100)
35 feet of lot frontage. Such driveways must be located a minimum of fifty (50) feet
36 from the right-of-way of any intersecting street.
37
38 3. On Arterial streets, one driveway may be permitted for each one-hundred-twenty-
39 five (125) feet of lot frontage. Such driveways must be located a minimum of two-
40 hundred (200) feet from the right-of-way of any intersecting street. No driveway
41 will be permitted for any lot with less than one-hundred-twenty-five (125) feet of
42 lot frontage unless there are no other viable options for access as determined by
43 the City Engineer.
44
45 4. Approval of driveway locations is determined by the City Engineer. Locations may
46 be denied based on other options for access, sight-distance, traffic levels, accident
47 history, separation from adjacent or opposite driveways or streets, or impacts to
48 public parking.
49
50 5. Driveway approvals on MoDOT controlled roads also require approval from
51 MoDOT.

6. The maximum width of a driveway measured at the property line for residential uses is highly dependent on the location, use, and need for on-street parking. In general, the following widths may be approved:
 - a. Single-family use in R-1 district: 32 feet
 - b. Two-family use: 40 feet
 - c. Three-family and Four-family dwellings: 22 feet per unit, up to 4 driveways
 - d. Other multi-family: Treated as commercial driveway
 - e. Locations in older areas of city: To be determined by City Engineer
 7. The maximum width of a driveway may be divided between up to two separate driveways for residential properties with one or two dwelling units. An additional driveway may be permitted for corner lots.
 8. The minimum width of a driveway measured at the property line for non-residential and multi-family uses is twelve (12) feet for a one lane one-way driveway and twenty (20) feet for a two lane driveway. The maximum width is fifteen (15) feet for a one lane driveway; twenty-four (24) feet for a two lane driveway; and thirty-four (34) feet for a driveway with an additional left turn exit lane. The City Engineer may approve wider driveways that primarily serve truck traffic.
 9. Unless no other access is possible, no additional driveways may be permitted on Lions Club Rd between US 63 and Hwy 72. Where such driveway is necessary, the City Engineer may approve the minimum number of shared driveways necessary to provide access to all lots.

Sec. 42.364 Traffic Impact Analysis

1. A traffic impact analysis may be required for any new development that will generate 100 or more peak hour trips using current Institute of Traffic Engineers Trip Generation Manual, or accessing a street or road or near an intersection with a known level of service of D, E, or F.
2. The following situations may trigger the requirement for a traffic impact analysis to be submitted:
 - a. A subdivision plat which would/could result in greater than 100 dwelling units.
 - b. Low rise multifamily with greater than 179 units
 - c. High rise multifamily with greater than 278 units
 - d. A hotel with greater than 167 rooms
 - e. A shopping center with greater than 26,000 square feet of gross floor area
 - f. A gas station with greater than 2,000 square feet of gross floor area

1. It is the purpose of this section to regulate the display of explicit sexual material and sexually oriented businesses in order to promote the health, safety, morals, and general welfare of the citizens of Rolla, Missouri, and to establish reasonable and uniform regulations to prevent the deleterious location and concentration of sexually oriented businesses within the City.
2. The provisions of this section have neither the purpose nor effect of imposing a limitation or restriction on the content of any communicative materials, including explicit sexual materials. Similarly, it is not the intent nor effect of this section to restrict or deny access by adults to explicit sexual materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market. Neither is it the intent or effect of this section to condone or legitimize the distribution of obscene or offensive material of a sexual nature.
3. Based on evidence concerning the adverse secondary effects of adult uses on communities as outlined in numerous studies/reports generally available for consideration, and on findings incorporated in a series of cases as found and included herein by reference to the IML Model Ordinance on Sexually Oriented Business Regulation, the City Council finds that:
 - a. Sexually oriented businesses lend themselves to ancillary unlawful and unhealthy activities that are presently uncontrolled by the operators of the establishments. Further, there is no mechanism to make the owners of these establishments responsible for the activities that occur on their premises.
 - b. Employees of certain sexually oriented businesses engage in higher incidences of certain types of illicit sexual behavior than employees of other establishments and that by offering or providing such locations may thereby create unhealthy conditions, unless properly regulated.
 - c. At least fifty (50) communicable diseases may be spread by activities occurring in sexually oriented businesses including but not limited to, syphilis, gonorrhea, human immunodeficiency virus infections (HIV-AIDS), genital herpes, hepatitis B, Non A, Non B amebiasis, salmonella infections and shigella infections. According to the best scientific evidence, AIDS and HIV infection, as well as syphilis and gonorrhea, are principally transmitted by sexual acts.
 - d. The number of cases of sexually transmitted diseases has been on the rise or remain at high levels in the United States.
 - e. The findings noted above raise substantial governmental concerns by establishing that sexually oriented businesses have operational characteristics that should be reasonably regulated in order to protect the public interest and to address substantial governmental concerns.
 - f. A reasonable licensing procedure is an appropriate mechanism to place the burden of that reasonable regulation on the owners and the operators of the sexually oriented businesses. Further, such a licensing procedure will place an

1 incentive on the operators to see that the sexually oriented business is
2 managed in a way consistent with the health, safety, and welfare of its patrons
3 and employees, as well as the general public. It is appropriate to require
4 reasonable assurances that the licensee is the actual operator of the sexually
5 oriented business, fully in possession and control of the premises and activities
6 occurring therein.

- 7 g. Removal of doors on adult booths and requiring sufficient lighting on premises
8 with adult booths advances a substantial governmental interest in curbing the
9 illegal and unsanitary sexual activity occurring in adult theaters.
- 10 h. Requiring licensees of sexually oriented businesses to keep information
11 regarding current employees and past employees will help reduce the
12 incidence of certain types of criminal behavior by facilitating the identification
13 of potential witnesses or suspects and by preventing minors from working in
14 such establishments.
- 15 i. The disclosure of certain information by those persons ultimately responsible
16 for the day to day operation and maintenance of the sexually oriented
17 business, where such information is substantially related to the significant
18 governmental interest in the operation of such uses, will aid in preventing the
19 spread of sexually transmitted diseases.
- 20 j. In the prevention of the spread of communicable diseases, it is desirable to
21 obtain a limited amount of information regarding certain employees who may
22 engage in conduct that this Chapter is designed to prevent, or who are likely to
23 be witnesses to such conduct.
- 24 k. The fact that an applicant for an adult use license who has been convicted of a
25 sexually related crime leads to the rational assumption that the applicant may
26 engage in that conduct in contravention of this section.
- 27 l. The barring of such individuals from the management of adult uses serves as a
28 deterrent to, and prevents conduct that leads to the transmission of sexually
29 transmitted diseases.
- 30 m. The general welfare, health, morals, and safety of the citizens of Rolla, Missouri
31 will be promoted by the enactment of this section.

51 **Sec 42.424 – 42.429 Reserved**

Section 430 Telecommunications

Sec 42.430 Telecommunications

1. Statement of Purpose. The general purpose of this section is to regulate the placement, construction, and modification of telecommunications Wireless Communications Facilities to protect the health, safety, and welfare of the public, while at the same time not unreasonably interfering with the development of the competitive wireless telecommunications marketplace in the City of Rolla. Specifically, this section is intended to:
 - a. Provide for the appropriate location and development of telecommunications facilities and systems to serve the citizens and businesses of the City of Rolla;
 - b. Minimize adverse visual impacts of Wireless Communications Facilities through careful design, siting, landscape screening, and innovative camouflaging techniques that provide predictability for nearby property owners and others that future uses will not materially alter such approved aesthetic protections without zoning hearing procedures and input from interested parties;
 - c. Ensure that any new Wireless Communications Facilities are compatible with the neighborhood or surrounding community to the extent possible; and
 - d. Ensure that regulation of Wireless Communications Facilities does not have the effect of prohibiting the provision of personal wireless services, does not unreasonably discriminate among functionally equivalent providers of such service and promotes the provision and availability of communication services within the City, and is no more burdensome than regulations applied to other types of infrastructure deployments.
2. Applicability; preemption. Notwithstanding any ordinance to the contrary, the procedures set forth in this section shall be applicable to all Wireless Communications Facilities existing or installed, built, or modified after the effective date of this Division to the fullest extent permitted by law. No provision of this section shall apply to any circumstance in which such application shall be unlawful under superseding federal or state law and furthermore, if any ~~section~~, subsection, sentence, clause, phrase, or portion of this section is now or in the future superseded or preempted by state or federal law or found by a court of competent jurisdiction to be unauthorized, such provision shall be automatically interpreted and applied as required by law.
3. Notwithstanding any right that may exist for a governmental entity to operate or construct Wireless Communications Facilities, it shall be unlawful for any person to erect or operate for any private commercial purpose any Wireless Communications Facilities in violation of any provision of this section, regardless of whether such Wireless Communications Facilities are located on land owned by a governmental entity.

24 **Sec 42.432 Application Procedures; Timing**

- 25 1. Applications. Applications for permitted, administrative, or conditional uses
26 pursuant to this section shall be subject to the supplementary procedures in this
27 section. Applications shall be submitted to the City as a complete application on
28 forms provided by the City. A "complete application" shall be an application
29 submitted on the forms provided by the City, fully executed by the applicant,
30 identifying the specific approval sought, and containing all attachments, fees as
31 may be established to reimburse the City for its inspection and review costs, and
32 information as required thereon or by the City, consistent with this section.
33 Applications shall be accompanied by a building permit application and other
34 applicable forms.
- 35
36 2. Proof of Owner Consent. Applications for permitted, administrative, or conditional
37 uses pursuant to this section shall be required to provide proof of owner consent,
38 which shall minimally include:
 - 39 a. Written consent to pursue the application by all fee simple owners of the
40 underlying real estate (or where located in street rights-of-way, the rights-of-
41 way owner thereof), including when the proposed location is also in a utility
42 easement; and
 - 43 b. Written consent to pursue the application of the owner of the structure on
44 which such Facility is to be placed, if different than applicant.
- 45
46 3. Timing. Applications shall be decided upon within a reasonable time, subject
47 further to state or federal specific additional time requirements as may apply to the
48 particular application.
- 49
50 4. Consolidated Applications for Small Wireless Facilities. An applicant may submit a
51 consolidated application and receive a single permit for up to 20 collocated Small

1 Wireless Facilities, provided that they are for the same or materially the same
2 design of Small Wireless Facility being collocated on the same or materially the
3 same type of Utility Pole or Support Structure. Denial of one or more Small
4 Wireless Facilities in a consolidated application shall not delay processing of any
5 other Small Wireless Facilities in the same consolidated application.
6

- 7 5. Opportunity to Cure. In case of a denial, the applicant may cure the deficiencies
8 identified by the City and resubmit the application within 30 days of the denial
9 without paying an additional application fee. The City shall approve or deny the
10 revised application within 30 days of resubmission and limit its review to the
11 deficiencies cited in the original denial.
12

13 **Sec 42.433 General Requirements**

- 14 1. Applicability. The requirements set forth in this section shall be applicable to all
15 Wireless Communications Facilities within the City installed, built, or modified after
16 the effective date of this section to the full extent permitted by law. Such zoning
17 review and approvals required in this section shall be in addition to any other
18 generally applicable permitting requirement, including applicable building,
19 excavation, rights-of-way, or other permits or approvals.
20
- 21 2. Principal or accessory use. Towers may be either a principal or accessory use in all
22 non-residential zoning districts, subject to any applicable requirement relating to
23 yard or setback. An accessory use subject to a leasehold interest of a person other
24 than the lot owner may be approved for a Tower only if the leasehold area
25 separately meets all requirements for a separate subdivided lot, including
26 dedicated access, parking, setbacks, and lot size, applicable to a principal use in the
27 district in which the use is proposed as if it was a separate subdivided lot. No other
28 district shall allow Towers unless required by law. All other Wireless
29 Communications Facilities and Utility Poles other than Towers, may be a principal
30 or accessory use in all districts subject to the requirements herein.
31
- 32 3. Building codes, safety standards, and zoning compliance. Wireless Communications
33 Facilities shall be constructed and maintained in compliance with all standards
34 contained in applicable state and local building codes. A certified engineer's
35 structural report shall be required for all applications to construct a new or modify,
36 or any way alter, a Support Structure, a Utility Pole, or Antenna, including Small
37 Wireless Facility and Fast Track, unless waived upon application to the Director
38 stating why such report is unnecessary to the specific application and a
39 determination in the discretion of the Director approving such statement. In
40 addition to any other approvals required by this Division, no Wireless
41 Communication Facility or portion thereof, except for a modification under 47
42 U.S.C. § 1455(a), shall be erected, replaced, or expanded prior to receipt of a
43 Certificate of Zoning Compliance, unless otherwise required by law, and the
44 issuance of a Building Permit. For sites within City rights-of-way, (1) the most
45 restrictive adjacent underlying zoning district classification shall apply unless
46 otherwise specifically zoned and designated on the official zoning map, (2) Wireless
47 Communications Facilities shall be installed and maintained as not to obstruct or
48 hinder the usual travel or public safety on the rights-of-way or obstruct the legal
49 use of such rights-of-way by authorities or authorized rights-of-way users; and (3)
50 such use shall be required to obtain applicable permits and comply with the City's
51 ROW management rules and regulations set forth in Article III of Chapter 36.

- 1 4. Regulatory compliance. All Wireless Communications Facilities shall meet or exceed
2 current standards and regulations of the FAA, FCC, and any other local, state, or
3 federal agency with the authority to regulate Wireless Communications Facilities,
4 and including all required licenses, permits, and taxes applicable to such structure
5 and/or modification. Should such standards or regulations be amended, then the
6 owner shall bring such devices and structures into compliance with the revised
7 standards or regulations within the time period mandated by the controlling
8 agency. No approval for any placement, construction, or modification of any
9 Wireless Communications Facilities permitted by this Division shall be granted for
10 any applicant having an uncured violation of this Division, any zoning regulation
11 regarding the lot on which the structure is proposed, or any other governmental
12 regulatory, licensing, or tax requirement applicable to such Wireless
13 Communications Facilities within the City unless preempted by applicable law.
14 Modifications under 47 U.S.C. § 1455(a) shall be approved without regard to zoning
15 regulations regarding the lot on which the modification is proposed.
16
- 17 5. Security. All Wireless Communications Facilities shall be protected from
18 unauthorized access by appropriate security measures. A description of proposed
19 security measures shall be provided as part of any application to install, build, alter,
20 or modify Wireless Communications Facilities. Additional measures may be
21 required as a condition of the issuance of a Building Permit as deemed necessary by
22 the Director or by the City Council in the case of a Conditional Use Permit.
23
- 24 6. Lighting. Antenna, Small Wireless Facilities, Fast Track, and Support Structures shall
25 not be lighted unless required by the FAA or other state or federal agency with
26 authority to regulate, in which case a description of the required lighting scheme
27 will be made a part of the application to install, build, alter, or modify the Antenna,
28 Small Wireless Facilities, Fast Track, or Support Structure. Lighting may also be
29 approved as a consistent component of a Disguised Support Structure. Equipment
30 Cabinets and Shelters may have lighting only as approved by the Director or City
31 Council on the approved site plan.
32
- 33 7. Advertising. Except for a Disguised Support Structure in the form of an otherwise
34 lawfully permitted sign, the placement of advertising on Wireless Communications
35 Facilities is prohibited other than on-premises signage of not greater than one
36 square foot on ground equipment or required safety signage.
37
- 38 8. Design.
 - 39 a. Color. Subject to the requirements of the FAA or any applicable state or federal
40 agency, Wireless Communications Facilities and attachments shall be painted a
41 neutral color consistent with the natural or built environment of the site or an
42 alternative painting scheme approved by the Director, or the City Council in the
43 case of Conditional Use Permits, consistent with the requirements of this
44 Division.
 - 45 b. Ground equipment. When authorized, equipment Shelters, or Cabinets shall
46 have an exterior finish reasonably compatible with the natural or built
47 environment of the site and shall also comply with any design guidelines as
48 may be applicable to the particular zoning district in which the facility is located
49 unless not feasible. All ground equipment shall be either placed underground,
50 contained in a single Shelter or Cabinet, or concealed within a building or
51 approved walled compound.

- 1 c. Antenna design. Antenna attached to a Disguised Support Structure shall be
2 contained within the Disguised Support Structure or within or mounted flush
3 on the surface to which they are mounted. Antenna attached to an existing
4 building, Utility Pole, or structure shall be of a color matching the surface to
5 which they are mounted. Antenna on the rooftop or attached to a building shall
6 be screened or constructed and/or colored to match the structure to which
7 they are attached.
- 8 d. Height. Support Structures and Antenna shall not exceed the height limitation
9 of any airport overlay zone as may be adopted by the City or other regulatory
10 agency. Support Structures and Utility Poles may exceed underlying zoning
11 district height restrictions for buildings and structures only where shown to be
12 necessary, provided that no reasonable and feasible alternative exists. To the
13 extent permitted by applicable law, district height restrictions shall be
14 considered by the City in determining the appropriateness of the design and
15 location of the application under the applicable standards for approval. No
16 Support Structure shall be approved at a height exceeding 120 feet AGL unless
17 the applicant clearly demonstrates that such height is required for the proper
18 function of the applicant's system.
- 19 e. Monopole design. All Towers shall be of a monopole design. Lattice, guyed
20 Towers, or other non-monopole Tower designs shall not be permitted.
- 21 f. Compound walls/landscaping. All Towers shall be surrounded by a minimum of
22 a six-foot high decorative wall constructed of brick, stone, or comparable
23 masonry materials and a landscape strip of not less than ten feet in width and
24 planted with materials, which will provide a visual barrier to a minimum height
25 of six feet. The landscape strip shall be exterior to any security wall. In lieu of
26 the required wall and landscape strip, an alternative means of screening may
27 be approved by the Director, or by the City Council in the case of a Conditional
28 Use Permit, upon demonstration by the applicant that an equivalent degree of
29 visual screening will be achieved. Landscaping or other improvements may be
30 required for Disguised Support Structures if needed to implement an approved
31 disguise.
- 32 g. Setbacks. All Support Structures shall be separated from any rights-of-way,
33 sidewalk or street, alley, parking area, playground, or other building which is
34 located on a another property, and from the property line of any adjacent
35 property at least a horizontal distance equal to 25% of the height of the
36 Support Structure.
- 37 h. Storage. Vehicle or outdoor storage on any Wireless Communications Facilities
38 site is prohibited, unless otherwise permitted by the zoning district.
- 39 i. Parking. One hard-surfaced parking spot per Support Structure for periodic
40 maintenance and service shall be provided.
- 41 j. Decorative poles. In districts where there are Utility Poles that were specifically
42 designed for their aesthetic nature and compatibility with the built
43 environment of that district, as determined by the City, such Utility Poles shall
44 be deemed to be decorative Utility Poles. Such decorative Utility Poles, when
45 authorized to be replaced by an applicant for Wireless Communications
46 Facilities pursuant to applicable law and in compliance with this Division and
47 Code, shall only be replaced with a substantially similar decorative Utility Pole
48 that matches the aesthetics and decorative elements of the original decorative
49 Utility Pole being replaced. Such replacement expenses shall be bore wholly by
50 the applicant seeking to place Wireless Communications Facilities on such
51 decorative Utility Pole.

- 1
2 9. Public property. Wireless Communications Facilities located on property owned,
3 leased, or otherwise controlled by the City shall be subject to the requirements of
4 this Division. A license or lease with the City authorizing the location of such
5 Wireless Communications Facilities shall be required for each site.
6
7 10. As-built plans. Within 60 days of completion of the initial construction and any
8 additional construction, three complete sets of plans drawn to scale and certified
9 as accurately depicting the location of all Wireless Communications Facilities
10 constructed shall be furnished to the City.
11
12 11. Historic preservation; 30-day hearing period. To the extent permitted by law,
13 approval shall not be issued for any Wireless Communications Facility that the
14 Director or City Council determines would create a significant negative visual
15 impact or otherwise have a significant negative impact on the historical character
16 and quality of any property within a Historic Preservation District or such District as
17 a whole. For collocation of any certified historic structure as defined in Section
18 253.545 RSMo., in addition to all other applicable time requirements, there shall be
19 a 30-day time period before approval of an application during which one or more
20 public hearings on collocation to a certified historic structure are held. The City may
21 require reasonable, technically feasible and technological neutral design and
22 concealment measures as a condition of approval of a Wireless Communication
23 Facility within a historic district or on a historic structure.
24
25 12. Administration. The Director shall have the authority to establish forms and
26 procedures consistent with this Division and applicable federal, state, and local law
27 to ensure compliance and to facilitate prompt review and administration of
28 applications.
29

30 **Sec 42.434 Permitted Use**

- 31 1. Permitted use. The placement of Wireless Communications Facilities fully
32 conforming with the applicable General Requirements in this section are permitted
33 in all zoning districts (including the right-of-way) only as follows:
34 a. Towers in industrial districts. Antennas attached to towers in industrial districts
35 are a permitted use.
36 b. Collocations on Existing Support Structures. The attachment of Antenna
37 including Small Wireless Facilities, or associated equipment to any existing fully
38 conforming Support Structure or Utility Pole, or as otherwise authorized by
39 state or federal law where local zoning is preempted, provided that building
40 permit requirements, national safety codes, and other applicable codes
41 including recognized accepted industry standards for structural, safety,
42 capacity, reliability, and engineering are satisfied, including specifically the
43 requirement to submit a certified structural engineering report.
44 c. Antenna on high-voltage Towers. The mounting of Antenna on or within any
45 existing high-voltage electric transmission Tower, but not exceeding the height
46 of such Tower by more than ten feet, provided that all requirements of this
47 Division and the underlying zoning ordinance are met, except minimum
48 setbacks provided in this Division shall not apply.
49 d. Antenna on existing buildings/structures. In all districts, except not on single-
50 family residential or two-family dwellings, the mounting of Antenna on any
51 existing and conforming building or structure (other than a Support Structure

1 or Utility Pole) provided that the presence of the Antenna and equipment is
2 concealed by architectural elements or fully camouflaged or concealed by
3 painting a color identical to the surface to which they are attached, and further
4 provided that all requirements of this Division and the underlying zoning
5 ordinance are met.

6 e. Collocation of Small Wireless Facilities on Authority Poles. In accordance with
7 Section 67.5112 RSMo, a wireless provider may collocate Small Wireless
8 Facilities and install, maintain, modify, operate, and replace Authority Poles, at
9 heights below the height limitations outlined in this Subdivision, which shall be
10 a permitted use in all districts except single-family residential and historic
11 districts subject to Subsection ii of this Section below. New, replacement, or
12 modification of Authority Poles under the following circumstances shall not be
13 considered a permitted use under this Section:

- 14 i. Proposals to construct or modify an Authority Pole that exceeds
15 the greater of 50 feet AGL or more than ten feet above the tallest
16 existing Authority Pole as of January 1, 2019 within 500 feet of the
17 proposed Authority Pole in the City; and
- 18 ii. Proposals to collocate on an existing Authority Pole in place on
19 August 28, 2018, that exceeds the height of the existing Authority
20 Pole by more than ten feet.

21
22 2. Application procedure. Application for a Permitted Use under this Section shall
23 require submission of an application with proof of owner consent and an
24 application fee of \$100.00 per Small Wireless Facility and an application fee of
25 \$500.00 for the installation, modification, or replacement of a Utility Pole and
26 collocation of a Small Wireless Facility thereon as required to partly cover the City's
27 actual costs, and not to exceed such amounts as may be limited by law. If the
28 applicant is not a Wireless Services Provider, the applicant must submit evidence of
29 agreements or plans, or otherwise provide attestations to the same, which
30 conclusively demonstrate to the City that the proposed site(s) will become
31 operational and used by a Wireless Services Provider within one year of the
32 permit's issuance date. For any application for a Small Wireless Facility, the
33 applicant shall provide an attestation that the proposed Small Wireless Facility
34 complies with the volumetric limitations as required to meet the definition of a
35 Small Wireless Facility in accordance with this Division and pursuant to applicable
36 law. Applicant shall also submit a certified structural analysis as required in the
37 General Requirements of this Division. Applications requesting any information that
38 is prohibited by federal or state law under the applicable circumstance shall be
39 deemed inapplicable to the subject application. The Director shall issue a decision
40 on the application for a permitted use within the time frame permitted by
41 applicable law. A decision to deny an application shall be made in writing and state
42 the specific reasons for the denial. With respect to a proposed collocation of a
43 Small Wireless Facility or installation, modification, or replacement of a Utility Pole,
44 the Director may deny the application only if the proposal could reasonably be
45 expected to:

- 46 a. Materially interfere with the safe operation of traffic and control equipment or
47 City-owned communications equipment;
- 48 b. Materially and demonstrably interfere with the safe operation of traffic control
49 equipment or City-owned communications equipment;
- 50 c. Materially and demonstrably interfere with sight lines or clear zones for
51 transportation, pedestrians, or non-motorized vehicles;

- d. Materially interfere with compliance with the American Disabilities Act, or similar federal or state standards regarding pedestrian access or movement;
- e. Materially obstruct or hinder the usual travel or public safety on the rights-of-way;
- f. Materially obstruct the legal use of the rights-of-way by the City, utility, or other third-party;
- g. Fail to comply with the spacing requirements;
- h. Fail to comply with applicable national safety codes, including recognized engineering standards for Utility Poles or Support Structures;
- i. Fail to comply with the decorative pole replacement requirements herein; or
- j. Fail to comply with undergrounding requirements;

Sec 42.435 Administrative Approval

- 1. Administrative approval. The placement of Wireless Communications Facilities fully conforming with the General Requirements in this section are permitted in all zoning districts (including the right-of-way) by Administrative Permit approved by the Director only as follows:
 - a. Disguised Support Structures. Any Disguised Support Structure shall have as a condition of approval, unless expressly exempted in the approval, an obligation that is recorded on the property that runs with the land for the benefit of the public, prohibiting modifications to the Disguised Support Structure that defeats the disguise, unless such proposed modification is approved by a duly authorized zoning or conditional use approval approved. If the applicant does not wish to have such a condition, the application shall not qualify for Administrative Permit approval, unless another mechanism is proposed and approved to ensure that the disguise is not subsequently defeated. A Disguised Support Structure proposed to be located within a public or private right-of-way, street, or other pedestrian or vehicular way may be exempted from the General Requirements of this Article relating to parking/access and setbacks, unless determined by the Director as applicable to the specific location for safety reasons or other applicable reasons.
 - b. Fast-Track Small Wireless Facilities. An application for a Fast-Track may be approved administratively by the Director, subject to meeting the following requirements:
 - i. General requirements. The following requirements shall generally apply to all Fast-Track located within the City:
 - 1. The Fast-Track shall substantially match any current aesthetic or ornamental elements of the Existing Structure or Utility Pole, or otherwise be designed to maximally blend in to the built environment, with attention to the current uses within the district at the proposed site;
 - 2. Any portion above the Existing Structure or Utility Pole shall be concealed and of the same dimensions and appearance so as to appear to be a natural extension of the Existing Structure or Utility Pole in lieu of an enclosure or concealment;
 - 3. The Fast-Track equipment shall not emit noise audible from the building line of any residentially zoned or used property; and

Sec 42.505 Minor Subdivision

1. A minor subdivision is an administrative process for subdivisions which create no more than five (5) additional lots.
2. If street, waterline, sewer line, or storm sewer infrastructure is found to be needed for the proposed lots of a minor subdivision, the applicant may submit improvement plans for the needed infrastructure, construct the infrastructure, and cause said infrastructure to be accepted by the city prior to pursuing the minor subdivision application; or the applicant may submit the request following the process for a final plat.
3. If additional easements or other dedications are found to be required due to the subdivision, the applicant may submit the request following the process for a final plat or may submit the dedications by separate instrument and cause such instruments to be accepted and recorded prior to approval of the minor subdivision.
4. If no street, waterline, sewer line, or storm sewer infrastructure or additional dedications are needed for the proposed subdivision, the applicant may follow the abbreviated process of this sub-section.
5. A property owner or authorized representative may request a review of a minor subdivision by submitting the following:
 - a. Completed application on forms supplied by the Community Development Department;
 - b. Letter authorizing a representative to apply on behalf of the property owner, if applicable;
 - c. Filing fee; and
 - d. Three (3) paper copies of the final plat and an electronic copy (pdf preferred).

- 1 6. Minor subdivision plats must include the following information:
 - 2 a. All information required of a preliminary plat for a first submittal.
 - 3 b. All information required of a final plat for the final submittal to be recorded,
4 except that the signature block for the Planning and Zoning Commission must
5 be replaced with a signature block for the Community Development Director;
6 and the dedication language must be replaced with a signature block for the
7 property owners to state that they are causing the plat to be created.
8
- 9 7. The Community Development Department receives the plat submittals and
10 coordinates review by city staff. The applicant may submit the final version of the
11 plat once all comments are addressed.
12
- 13 8. If approved, the plat may be recorded with the Phelps County Recorder of Deeds
14 once all required signatories have signed the plat and all fees have been paid.
15
- 16 9. The applicant is responsible for the recording of the plat with the Phelps County
17 Recorder of Deeds and all associated costs. The applicant must provide the record
18 number to the Community Development Department after recording the plat. The
19 plat will be deemed invalid if not recorded within one (1) year of approval.
20
- 21 10. If disapproved, the applicant may appeal the decision to the Board of Adjustment
22 or may request the subdivision be processed following the processes for a final
23 plat.
24

25 **Sec 42.506 Lot Consolidations and Lot Line Adjustments**

- 26 1. Lot consolidations and lot line adjustment applications are reviewed
27 administratively. A lot consolidation is recorded on the city records to enable the
28 interior lot lines to be disregarded for setbacks, bulk standards, etc. A lot line
29 adjustment allows for the lot lines to be relocated if such change follows all zoning
30 requirements.
31
- 32 2. No street or utility extensions or dedications must be necessary for the lot
33 combination or lot line adjustment.
34
- 35 3. A property owner or authorized representative may request a review of a lot
36 consolidation or lot line adjustment by submitting the following:
 - 37 a. Completed application on forms supplied by the Community Development
38 Department;
 - 39 b. Letter authorizing a representative to apply on behalf of the property owner, if
40 applicable;
 - 41 c. Filing fee;
 - 42 d. One (1) paper copy of a lot consolidation/lot line adjustment exhibit and an
43 electronic copy (pdf preferred); and
 - 44 e. Proposed legal descriptions of the affected lots.
45
- 46 4. The lot consolidation/lot line adjustment exhibit is not required to be prepared by a
47 registered land surveyor, but the exhibit must:
 - 48 a. be prepared to be to scale;
 - 49 b. show the entirety of all affected lots;
 - 50 c. provide an approximate distance from proposed property lines to any existing
51 buildings if the building could potentially be within a required setback;

- d. show the approximate location of sewer and water service lines; and
- e. include the property address(s), the property owner(s) names, north arrow, and scale.

- 5. The Community Development Director may reject an exhibit not prepared by a surveyor if the exhibit does not show the required information and/or does not clearly indicate the purpose of the lot consolidation/lot line adjustment.
- 6. The Community Development Department receives the application and submittals and coordinates review by city staff.
- 7. For a lot consolidation, the prepared deeds must include the following language:

The intent of this instrument is to permanently combine the lots included in the legal description to allow them to be treated as one lot for the purposes of building permits and zoning. The lot(s) may not be separated unless approved by the City of Rolla.
- 8. If approved, the applicant may record a deed(s) to combine the lots or to adjust the lot lines with the Phelps County Recorder of Deeds. The applicant must provide a copy of the recorded deeds to the Community Development Department.
- 9. The approval of the lot consolidation/lot line adjustment will be deemed invalid if deeds are not recorded within one (1) year of approval.
- 10. If disapproved, the applicant may appeal the decision to the Board of Adjustment.

Sec 42.507 Subdivision Exceptions

- 1. The Commission may approve a subdivision exception from the provisions of this section where it finds that an undue hardship or practical difficulty may result from requiring strict compliance with this section. A subdivision exception may be approved so that substantial justice may be achieved and the public interest secured, provided that any such variance shall not have the effect of nullifying the expressed purpose of this Zoning and Subdivision Code.
- 2. No application for preliminary plat which would create conditions requiring a variance or exception from zoning regulations by the Board of Adjustment, shall be submitted to the Commission unless and until the applicant's petition for variance or exception shall have been first approved by the Board of Adjustment.
- 3. No subdivision exception shall be granted by the Commission unless it is found that:
 - a. The granting of the subdivision exception would not be detrimental to the public safety, health, or welfare or be injurious to other property or improvements in the vicinity of the subject property; and
 - b. The conditions upon which the request for subdivision exception is based are unique to the property for which the subdivision exception is sought, are generally not applicable to other properties, and are not self-imposed; and
 - c. Because of the particular physical surroundings, shape or topographical feature of the specific property involved, a particular hardship to the owner would result, as distinguished from a mere inconvenience, depriving the owner of the

1 reasonable use of his land should the strict interpretation of these regulations
2 be enforced; and
3 d. The subdivision exception will not in any manner abrogate the goals,
4 objectives, or policies of the Rolla Comprehensive Plan.

- 5
- 6 4. The Commission shall be empowered to grant subdivision exceptions with respect
7 to the improvements and the design standards relative to and arrangement, street
8 location, alignment, the location and alignment of easements, and similar
9 standards. The Commission may establish certain conditions on subdivision
10 exception approval that will, in the judgment of the Commission, substantially
11 secure the purpose of this Zoning and Subdivision Code.
- 12
- 13 5. If denied by the Commission, the City Council shall review the denial for a variance
14 upon a written appeal by an applicant.
- 15
- 16 6. Requests for subdivision exceptions may be submitted concurrently with the
17 review of the preliminary plat; or final plat if it is a minor subdivision. The written
18 subdivision exception request shall state precisely the provisions from which a
19 subdivision exception is needed along with the reasons for the subdivision
20 exception, particularly as the request relates to the conditions of subdivision
21 exception approval.
- 22
- 23 7. Requests for subdivision exceptions may be submitted independent of plat review
24 if the applicant can show good cause why such request was not made when the
25 plat was filed. Such requests must be approved by both the Commission and the
26 City Council.
- 27
- 28 8. The City Council may elect to disapprove a preliminary or final plat based on the
29 approval of a subdivision exception by the Commission.

32
33

1 **Sec 42.510 Subdivisions – Additional Options**

- 2
- 3 1. Phasing. The final plat for any major subdivision that has received preliminary
- 4 approval may be submitted in sections or phases provided: (a) each phase satisfies
- 5 the requirements set forth in this Subdivision Code and other City ordinances; (b)
- 6 all required improvements are provided for each phase along with any other
- 7 necessary improvements to secure the subdivision's orderly development; and (c)
- 8 adequate assurances are made for the completion of improvements required for
- 9 each phase. Proposed phasing should be shown on the preliminary plat. The
- 10 Director, with input from the City Engineer, shall determine if the proposed phasing
- 11 of the final plat satisfies these requirements.
- 12
- 13 2. Re-platting/Re-subdivision. Re-subdivision shall be required to change an approved
- 14 or recorded final plat through the final plat process when such change will affect
- 15 public right-of-way, areas reserved for public use, easements, the vacation of right-
- 16 of-way, areas reserved for public use and easements dedicated to the City.
- 17
- 18 3. Cluster subdivisions. Cluster subdivisions may be approved which will result in
- 19 improved living and working environments; which will promote affordable housing
- 20 by reducing development costs and encourage a variety of dwelling types; which
- 21 will support ingenuity and originality in total subdivision design; and which will
- 22 preserve open space for recreational, scenic and public service purposes. To
- 23 achieve these purposes:
- 24 i. Variations in lot areas, widths, lot coverage and setbacks are
- 25 permitted as long as overall dwelling unit densities established for
- 26 the respective residential zoning district are not exceeded;
- 27 ii. Procedures are established to assure adequate maintenance and
- 28 restricted use of open space areas for the inhabitant's benefit only
- 29 or for dedication to public use; and
- 30 iii. Procedures are established to assure adequate protection of
- 31 existing and potential developments adjoining the proposed cluster
- 32 subdivision.
- 33
- 34 a. The minimum size of a lot of record within a residential cluster subdivision shall
- 35 be three-thousand (3,000) square feet.
- 36
- 37 b. All lot size reductions shall be compensated for by an equivalent amount of
- 38 land permanently preserved as open space or common area; excluding parking
- 39 lots, private drives, open storage areas or any land which has been or will be
- 40 conveyed to a public agency under a purchase agreement or to meet the park
- 41 land dedication requirements. The open space may be dedicated to the public
- 42 in the manner prescribed herein or may remain in private ownership.
- 43
- 44 c. Cluster subdivisions shall be considered as a major subdivision regardless of the
- 45 number of proposed lots. The sketch plan review shall be mandatory.
- 46
- 47 d. The Commission must find that the proposed cluster subdivision:
- 48 i. Is consistent with the Rolla Comprehensive Plan;
- 49 ii. Will provide usable and accessible open space for recreation or public
- 50 use based on the size, shape, and topographic characteristics of the
- 51 site; and

- 1 iii. Will include open space with significant and irreplaceable natural and
2 manmade features.
3
- 4 e. The plat must describe all reductions in lot size, setbacks, lot coverage, etc.
5 approved by the plat.
6
- 7 4. Zero lot line. The purpose of zero lot line construction is to permit a procedure for
8 development that will result in improved living and working environments; which
9 will promote more economic subdivision layout; which will encourage a variety of
10 types of residential dwellings; which will support ingenuity and originality in total
11 subdivision design; and which can preserve open space to serve the recreational,
12 scenic and public service purposes related thereto, all within the densities
13 established by the zoning district in which the zero lot line construction is
14 permitted.
15
- 16 a. The required side yard setback in the R-1 and R-2 Districts may be zero (0) on
17 one side of the lot provided:
18 i. The lot adjacent to that side is also owned by the applicant or proof of
19 consent is provided from the adjacent lot owner at the time of initial
20 construction and the minimum side yard setback for such adjacent lot
21 is either zero (0) or not less than ten (10) feet;
22 ii. The opposite side yard must be a minimum of ten (10) feet;
23 iii. The adjacent side yard setback is perpetually maintained free and clear
24 of any obstructions other than a three (3) foot eave encroachment,
25 normal landscaping, patios, garden walls or fences unless it is a zero (0)
26 side yard;
27 iv. The wall located at the zero (0) side yard setback is constructed with
28 easily maintained, solid material without windows, except clerestory
29 windows;
30 v. No portion of the dwelling or architectural features project over any
31 property lines; and
32 vi. The zero (0) side yard is not adjacent to a public or private street or
33 alley right-of-way.
34
- 35 c. Appropriate private maintenance and use easements shall be shown on the
36 final plat for all affected properties. The maintenance and use easement shall
37 be included in the deed or deeds for all affected properties. A separate private
38 covenant or easement must be filed for the private maintenance and use
39 easement.
40
- 41 d. The zero (0) side wall shall be placed precisely on the lot (property line) with a
42 perpetual maintenance easement on the adjacent lot.
43
- 44 e. A zero lot line lot may be created through a minor subdivision or major
45 subdivision. A precise site plan, shall be submitted. Said plan shall delineate all
46 structures proposed for initial construction.
47

48 **Sec 42.511 Design Requirements – General**

- 49 1. In addition to the requirements established herein, all subdivision plats shall
50 comply with the relevant laws, rules, and regulations, such as the City's zoning
51 code, and regulations of the Phelps County Health Department and/or appropriate

1 State agencies, Missouri Department of Transportation if abutting a State highway,
2 and appropriate State and federal agencies.

- 3
- 4 2. The proposed name of the subdivision shall not duplicate or sound like the name of
5 any other subdivision, any existing or platted street, or any unrelated established
6 business or development in Phelps County. Whenever final plats of a subdivision
7 are approved in phases, each submittal for final approval shall be numbered
8 consecutively.
- 9
- 10 3. Re-plats may be approved with a different subdivision name from the original plat,
11 or may numbered consecutively. The sub-title of any re-plat must reference the
12 original plat and refer to the re-plat as a re-plat or re-subdivision, i.e. "YYY
13 Subdivision, a Re-plat of ZZZ Subdivision, Lot 1"; or "ZZZ Subdivision Number 2, a
14 Re-plat of ZZZ Subdivision, Lot 1".

15

16 **Sec 42.512 Design Requirements – Streets**

- 17 1. Conformity: The character, extent, width, grade, and location of all streets shall
18 conform to the Comprehensive Plan or Major Thoroughfare Plan and shall be
19 considered in their relation to existing and planned streets, to topographic
20 conditions, to public convenience and safety, and in their relation to proposed
21 adjoining land uses. Where not shown on any map or plan, the arrangement and
22 other design standards of streets shall conform to the provisions found herein.
- 23
- 24 2. Relation to Adjoining Streets: The arrangement of streets in new subdivisions shall
25 make provision for the continuation of the existing streets into the abutting
26 subdivision or tract where appropriate and must connect to adjoining streets or
27 street rights-of-way which dead end at the boundary line.
- 28
- 29 3. Extension of Streets: The Planning and Zoning Commission may require that street
30 rights-of-way be extended to the property line to facilitate future connectivity.
31 Generally, streets should be extended to larger, undeveloped/developable
32 property at intervals of approximately 500 to 1,200 feet, except in cases where site
33 conditions would make connection unnecessary, undesirable, or impractical. A
34 temporary turnaround approved by the City Engineer shall be installed at this point
35 unless the terminus of the new street is less than two hundred (200) feet from the
36 intersecting right-of-way of an existing street.
- 37
- 38 4. Secondary access: All new subdivisions must adhere to the International Fire Code,
39 Appendix D, as amended and adopted, for emergency vehicle access.
- 40
- 41 5. Street Jogs Prohibited: Street jogs with centerlines offsets of less than one hundred
42 fifty (150) feet shall be prohibited.
- 43
- 44 6. Dead-end Street or Cul-de-Sac: Dead-end streets or cul-de-sacs shall require a
45 turnaround at intervals not to exceed six hundred (600) feet and shall be provided
46 at the closed end with a turnaround having a minimum property line diameter of
47 one hundred (100) feet. If a dead-end street is of a temporary nature, the City
48 Engineer may require a similar turnaround along with provisions made for the
49 future extension of the street. The City Engineer may approve alternative
50 turnaround standards, such as "hammerhead" or "Y" configurations, if adequately
51 designed to provide traffic circulation and better land use.

- 7. Dead-end Street or Cul-de-sacs generally discouraged, except in limited cases, as determined by the Commission, where adjacent properties are fully developed, drainage ways, areas with steep slopes, areas with existing buildings or common areas, railroads, highways, and adjacent to properties with a different zoning classification. The Commission may require that dead ends or cul de sacs be eliminated, where possible.
- 8. Minor Streets: Minor streets shall be arranged so as to discourage through traffic, to permit efficient drainage and utility systems, and to require the minimum number of streets necessary to provide convenient and safe access to all properties. Minor streets should provide connectivity within a neighborhood and connectivity between neighborhoods.
- 9. Street Widths: The street pavement width required must adhere to the latest typical street section standards published by the Rolla Department of Public Works. The right-of-way width required to be dedicated shall be:

Street Type	Right of Way Width
Cul-de-Sac	50'
Minor (Local)	50'
Collector	50'
Collector-Commercial	60'
Arterial	80'

- 10. Street widths in commercial and industrial zones: Greater right-of-way widths may be required as determined by traffic projections made by the City Engineer for commercial or industrial zones.
- 11. Right-of-way dedication: Additional rights-of-way may be required for adjacent streets and roads which for which the existing rights-of-way are not adequate.
- 12. Street width reduction: The right-of-way and pavement width required for public or private streets may be reduced for developments which provide for off-street parking. Such street paving and right-of-way width may be reduced as determined by the City Engineer if adequate easements for utilities are provided. Barrier curbs and appropriate signage are required to prevent parking on the street. A minimum of one space for each lot/dwelling unit of private off-street parking must be provided for guests. Sidewalks are required on both sides of the street.
- 13. Intersections: Streets shall intersect one another at as near a ninety (90) degree angle as is possible. No intersection of streets at angles less than seventy (70) degrees shall be approved. At each street intersection the property line at the block corner shall be rounded with a curve having a radius of not less than twenty five (25) feet. The intersection of more than two (2) streets at any one (1) point shall be prohibited.
- 14. Subdivision into Tracts Larger than Ordinary Building Lots: Where a tract is subdivided into larger parcels than ordinary building lots, as determined by the Director, such parcels shall be arranged so as to allow the opening of future streets and future subdivision.

15. Curves: A tangent of at least one hundred (100) feet in length shall be introduced between reverse curves on all streets, except for minor streets.
16. Reserve Strips: Reserve strips that control access to abutting streets and, as determined by the Director, do not provide sufficient area to be of practical use under the area's existing zoning classification, shall be prohibited.
17. Half-Street Prohibited: Half-streets shall be prohibited except to complete the remaining half of an existing half-street.
18. Street Names: Names of new streets shall not duplicate existing or platted street names unless the new street is a continuation of, or in alignment with and within 2,000 feet, the existing or platted street. In such cases, it shall carry the name of the existing street. Names shall be easily spelled and pronounced.
19. Gated Subdivisions: Gated subdivisions are discouraged and may only be approved where all impacted streets are private. Adequate provisions for turnarounds must be provided.
20. Alleys: Alleys may be platted in any subdivision with right-of-way widths of no less than twenty (20) feet. Dead-end alleys shall not be permitted, except where adequate turnaround is provided.
21. Access: Lots in the R-1 and R-2 districts created through the subdivision process with frontage on a collector or arterial street, will not be allowed direct access to a collector or arterial street unless no other access is possible. Shared access easements may be required for any proposed lots fronting on collector or arterial streets. Any needed access easements must be shown on the plat.
22. Access Restrictions. Access restrictions may be created by covenant on a plat. Access may be limited on collector and arterial streets.

Sec 42.513 Design Requirements – Utilities

1. An easement for utilities may be required along the side, and/or rear lot lines where necessary to form a continuous easement of at least ten (10) feet in width.
2. A ten (10) foot utility easement may be required along the frontage of lots along streets with less than sixty (60) feet of right-of-way width; and collector and arterial streets.
3. If necessary to accommodate the extension of water or sewer lines, to provide space for pole guys for overhead lines along the periphery of a subdivision, or when unusual circumstances require additional space, a total utility easement width of twenty (20) feet or greater may be required.
4. A five (5) foot utility easement may be required as needed for street lighting.
5. Where possible, utility easements shall connect to easements already established in adjoining properties.

6. Drainage easements of varying widths and locations for storm water management may also be required as determined by the City Engineer.

Sec 42.514 Design Requirements – Platting

1. Blocks. Block lengths shall not exceed thirteen hundred twenty feet (1320) feet, nor be less than two-hundred-fifty (250) feet. Pedestrian crosswalks of not less than six (6) feet in width or an alley located in the center of the block may be required for blocks in excess of thirteen hundred twenty (1320) feet in length.
2. Lot Location: All residential lots, parcels, or tracts shall abut by their required frontage on a publicly dedicated street right-of-way. As an option for non-residential development, access to a publicly dedicated street may be provided through a recorded private cross or access easement a minimum of forty (40) feet in width, where not detrimental to the future subdivision of adjacent land. The easement shall be recorded as part of the platting process.
3. Lot Lines: Side lot lines should be substantially at right angles to straight street lines or radial to curved street lines.
4. Corner Lots: Corner lots should be provided extra width to permit required building setbacks.
5. Flooding: Lots located entirely within the FEMA designated 100 or 500 year floodplain and deemed by the Director and the City Engineer to be a danger to public health and safety if developed for residential use shall not be platted. Lots or tracts subject to periodic flooding may be dedicated to the city, combined with adjacent lots, or used for recreational use, open space, or other uses that will not increase the potential flood hazard in the drainage basin.
6. Stream Buffer Crossings: The minimum number of road crossings of a stream buffer should be used within each subdivision, and no more than one crossing is allowed for every three hundred (300) feet of buffer. The Stream Buffer requirements are described in Chapter 15 of the Rolla Municipal Ordinances.
7. Lot Remnants: All lot remnants below the minimum permitted size shall be added to adjacent lots, rather than permitted to remain as unusable parcels. Such lots may be platted as common lots.
8. Double Frontage Lots: Double frontage lots should be avoided, except where required to provide separation of development from highway or arterial streets or to overcome specific topographic disadvantages.
9. Flag Lots: Flag lots may be platted when the following criteria are met:
 - a. Flag lots will be allowed provided the minimum lot area is consistent with the requirements of the respective zoning district designation.
 - b. The access portion of such lots must have a minimum width of twenty-five (25) feet for lots less than three acres in size, and not longer than two hundred fifty (250) feet in length. For lots greater than three acres in size, the access portion must have a minimum width of fifty (50) feet.

- c. The access portion of such lots may serve up to two lots with a shared driveway and cross-access easement. In such case, the access portion of each lot may be reduced to 12.5 feet to share the driveway.
- d. Flag lots with an access portion more than one hundred (100) feet in length must be served by a driveway which meets the width and construction standards for fire access, as determined by the fire department.

Sec 42.515 Design Requirements – Parks Dedication

1. Purpose: A parks dedication is required in order to provide an adequate level of public park facilities and services to new development based on the open space needs generated by the development and to ensure that such development occurs in a manner that is consistent with the components of the City’s comprehensive plan. This section should encourage the placement of parks within new residential developments or near or within a walkable distance of such developments, or will provide for the development of neighborhood or community parks by considering cash payment in lieu of parkland dedication.
2. Applicability: This provision shall apply to all residentially zoned subdivisions or re-subdivisions for residential uses that have not been previously subject to parkland dedication or fee in lieu of which create additional developable lots. This provision does not apply to boundary line adjustments or lot consolidations. The requirement for a fee-in-lieu payment also applies when a lot is rezoned from a non-residential district to a residential district, to be due prior to issuance of a building permit for development/redevelopment of the lot.
3. Prior to Recording the Final Plat: The applicant shall, as part of the final plat process, provide a warranty deed to the City in a form that is acceptable to the City or provide an equivalent fee-in-lieu payment, prior to recording the final plat.
4. Dedication Requirements: The area to be dedicated shall be clearly labeled and delineated on the subdivision plat and shall meet the following requirements:
 - a. *Topography*: At least 50 percent of the tract shall have a grade of less than four percent. The balance may be covered with slope, streams, ponds, or other natural features. Retention areas or detention basins which are required by the City’s storm water regulations, drainage easements, or water detention areas will not qualify for the parkland requirement.
 - b. *Public Use*: This requirement shall be in addition to any private open space or recreation facilities designated for the sole benefit of the subdivision residents.
 - c. *Location*: The parkland shall have access on a public street with a minimum frontage of 60 feet. Consideration shall be given to placing parks where they can be added to by future subdivisions or as an addition to an existing park. Consideration may be given to the existing and planned park facilities in the vicinity.
 - d. *Size and shape*: The tract size shall not be less than one acre in size, unless, in the opinion of the Parks and Recreation Director and the Parks Advisory Commission, this land can be added to an adjacent existing park or future park.
 - e. *Approval*: The Parks Advisory Commission and the Parks and Recreation Director shall recommend the tract as suitable for use as a public park if the requirements listed above have been deemed satisfied before the plat can be approved by the City Council. The area of the tract shall be based upon a calculation using the following schedule:

- i. R-1, R-2, U-R districts: 5% of total residential area subdivided.
- ii. R-3, R-4 districts: 7% of total residential area subdivided.

5. Computation: The percentage of land deeded shall be based upon the total area of the development or subdivision used for residential uses (lots), excluding any non-residential uses. Non-residential uses shall include such areas as right-of-way, dedicated conservation areas, or private amenities, provided there are no residences on these areas. If, during the subdivision process, a rezoning is proposed for the same property, this provision will apply at the rate that is consistent with the newly proposed zoning district.
6. Parks Director: The required dedication or fee is calculated by the Parks Director. The Parks Director will provide a report to the appropriate City departments, the Commission, and the City Council for final determination that describes the suitability of the proposed land to be dedicated and the way in which the parkland dedication requirement was calculated and, if applicable, the way in which the fee in lieu of was calculated and the amount due by the applicant.
7. Encumbrances: The deeded land shall be free of liens, special assessments, and other encumbrances and shall have all taxes paid to the date of deeding.
8. Use of Dedications: Nothing herein shall prevent the City from using such deeded park property as allowed by Sec. 77.140 RSMo.
9. Fee in Lieu of Park Dedication: If the land available within the subject subdivision proposal does not meet the requirements and stipulations of this section, a fee in lieu of parkland dedication shall apply. The payment shall be calculated at a rate of \$15,000 per acre of the parkland acreage requirements as calculated above. Any fractional parts of an acre shall be prorated. This rate will apply unless the developer can demonstrate to the satisfaction of the Parks Director and the Parks Advisory Commission that the current fair market value should be used.
10. Payment of Fee in Lieu: All fee-in-lieu payments shall be deposited into the Parks and Recreation Land Escrow Account. The applicant shall deposit the required amount into this account without recourse or the right of recovery. Such cash deposit shall be made prior to the recording of the Final Plat.
11. Use of Fee in Lieu Payments: These cash payments shall used for the following purposes in priority as determined by the City Council with the advice and recommendation of the Parks Director and the Parks Advisory Commission:
 - a. Acquisition of neighborhood or community parks within one-half of a mile of the applicable subdivision.
 - b. Improvements to existing parks within one mile of the applicable subdivision.
 - c. Acquisition or improvement of larger regional or community-wide parks.
12. Reassessment of Rates: The dollar amount per acre value established herein will be reassessed not sooner than every five years from June 4, 2018 based on the cost of inflation/increase in property values.

Sec 42.516 Design Requirements – Other

- 1 1. The improvements required in any subdivision shall be in accordance with the
2 following and shall conform to the City of Rolla "Standards and Specifications"
3 which are hereby adopted as the design standards for the public improvements
4 required by this Zoning and Subdivision Code.
5
- 6 2. Streets and Alleys: The subdivider shall grade and pave all new streets and alleys (if
7 any) within the subdivision. It is the City's policy to participate in or contribute only
8 to certain additional costs for the construction of collector or arterial streets over
9 and above the normal construction costs for minor street standards, when such
10 collector and arterial streets are identified on the Major Thoroughfare Plan, or
11 when designated by the City Engineer. Such participation is not mandatory and is
12 solely at the election of the City Council.
13
- 14 3. Sanitary Sewers: The subdivider shall extend sanitary sewer access and install
15 sanitary sewer connections for each lot. When sanitary sewers are not available, as
16 determined by the City Engineer, the subdivider shall install within the subdivision
17 capped sewer mains and house connections to each lot in addition to other
18 required onsite sewerage facilities. Prior to final approval of the plat, the subdivider
19 shall provide the City Engineer, for his approval, detailed construction plans for the
20 proposed sanitary sewer system. The city may participate in the costs of installing
21 sewer for sewer lines which may serve a large area beyond the properties owned
22 by the subdivider.
23
- 24 4. Storm Sewers: The subdivider is responsible for construction of all needed storm
25 sewer and storm water collection and storage systems necessary for development.
26 Construction plans for storm sewer facilities shall be shown both in plan and profile
27 with details of all necessary facilities. The data regarding the area to be served by
28 the facilities and the estimated run-off from the area tributary to the facilities
29 beyond the subdivision shall accompany the detailed plans. The city may
30 participate in the costs of installing storm water facilities if such facilities may serve
31 a large area beyond the properties owned by the subdivider.
32
- 33 5. Survey Standards and Monuments: The subdivider's surveyor shall establish, or
34 confirm the prior establishment, of permanent monuments at each controlling
35 corner on the boundary of the subdivision and at all block corners, point of
36 intersections, points of curvature, and points of tangency within the subdivision.
37 Monuments may be selected from the types described by the "Minimum Standards
38 for Property Boundary Surveys" of the Missouri Department of Natural Resources.
39 In addition, the subdivider's surveyor shall establish at least two (2) permanent
40 monuments as approved by the City Engineer for each block in the subdivision.
41 Monuments shall be placed so as to create base lines in each block from which all
42 points and lines in that block are laid out.
43
- 44 6. Sidewalks: The subdivider shall be responsible for the construction of sidewalks
45 along all proposed and existing streets within and adjacent to the development as
46 required by this Zoning and Subdivision Code.
47 a. Construction of sidewalks may be deferred per the requirements of this
48 section.
49 b. The Planning Commission may approve an alternative sidewalk plan to allow
50 modifications to the sidewalk requirements, or in a Planned Unit Development,

1 where the subdivider has submitted a proposed pedestrian circulation plan
2 that provides more direct and safer movement of pedestrian traffic.

- 3
4 7. Fire Hydrants: Fire hydrants shall be placed by the subdivider in accordance with
5 the requirements of the City's Fire Chief, International Fire Code, Rolla Municipal
6 Utilities, and the state inspection bureau of Missouri.

7
8 **Sec 42.517 Subdivision Improvement Guarantees**

- 9 1. Before the final plat of any subdivision is recorded, the subdivider shall provide for
10 the improvements described in this section to be extended to all lots shown on the
11 final plat. Subdivision Improvements includes all streets, alleys, waterlines, sewer
12 lines, storm sewers, stormwater detention basins, sidewalks, and any other
13 infrastructure which the developer will construct to serve the development. In lieu
14 of completion of the said improvements prior to recording, the subdivider or other
15 person who agrees with the City to make public improvements on behalf of the
16 subdivider, may post surety bond with one or more corporate sureties engaged in
17 the business of signing surety bonds in Missouri, an escrow agreement, letter of
18 credit or other appropriate security agreement, as approved by the City Engineer,
19 that will insure that the improvements will be completed by the subdivider.
20
21 2. The amount of corporate surety bond, escrow agreement, or other appropriate
22 security agreement shall not be less than the estimated cost of the public
23 improvements as determined by the City Engineer. The infrastructure may be
24 divided into phases of construction.
25
26 3. The City Engineer may, during the period of such bond, accept substitution of
27 principal or sureties on the bond or a substitution of a letter of credit, escrow or
28 other approved security agreement.
29 a. The City Engineer may require that certain improvements, such as storm water
30 facilities, be made and refuse to accept security for such improvements when
31 he determines that the improvements are necessary for immediate protection
32 of adjacent property. Otherwise, all improvements shall be completed within
33 two (2) years after recording the plat.
34 b. The Commission, upon proof of hardship, may extend the completion date for
35 improvements stated in the bond agreements for a maximum period of one (1)
36 additional year; provided the request is made prior to the end of the second
37 year following recordation and provided the security amount is revised if
38 required by the City Engineer.
39 c. The Commission may also defer at the time of final plat approval, subject to
40 appropriate conditions, the provision of any such improvements as, in its
41 judgment, are not appropriate because of incompatible grades, future planned
42 public improvements, inadequate or lack of connecting facilities, or other
43 reasons.
44
45 4. The release or reduction of required surety bonds, escrow agreement or other
46 security agreement shall be in accordance with the following:
47 a. When a petition for improvements by the tax bill method is filed and when said
48 petition has passed the required remonstrance petition assuring the City that
49 all improvements will be provided, said bond or agreements posted by the
50 subdivider may be released by the City Engineer.

1 b. The City Engineer may release or reduce said bond or agreements when he has
2 determined that all or a portion of the required improvements have been
3 satisfactorily completed and are free of any liens or other encumbrances. Any
4 reduction in the bond or agreements shall not exceed the ratio of the cost of
5 the completed improvements bears to the total estimated cost of all public
6 improvements for the plat.
7

8 5. Said improvement guarantee expires two (2) years after being executed, or another
9 date provided by the document. If all improvements are not complete after the
10 expiration the guarantee must re-negotiated with current costs of construction for
11 all remaining infrastructure to be built.
12

13 6. In particular, it is expected that the developer will construct all remaining sidewalks
14 within the development if the development is not fully built-out within the first two
15 (2) years.
16

17 7. If the improvements are not complete after the terms of the guarantee and the
18 guarantee is not re-negotiated, the city has the right to demand payment of the
19 guarantee, pursuant to state statutes, to pay for the cost of completing the
20 improvements.
21

22 **Sec 42.518 Building Permits After Platting**

- 23 1. No building permits may be issued prior to the final plat being recorded.
24
25 2. No certificate of occupancy may be issued for a building in the development until
26 the infrastructure in the development, or phase of construction, if applicable, has
27 been completed and accepted by the city.
28
29 3. Sidewalks adjacent to the developed lot and any adjacent lots under the same
30 ownership (other than the developer) must be constructed prior to the issuance of
31 a certificate of occupancy.
32

33 **Sec 42.519 Common Lots and Open Space**

- 34 1. The regulations set forth in this sub-section shall apply in all developments where
35 the following features are held in common ownership by persons owning property
36 within a development.
37 a. All lands in common open space, not a part of individual lots, designed for the
38 mutual benefit of a group of persons owning property within a development,
39 where such lands are not dedicated to or conveyed for public use; whether or
40 not such lands are required by the provisions of this section; and
41 b. All private streets, driveways, parking facilities, and buildings or portions
42 thereof, as may be provided for common use, benefit and/or enjoyment of the
43 development occupants; whether or not such improvements are required by
44 the provisions of this Zoning and Subdivision Code.
45
46 2. All common open space and improvements shall be protected by legal
47 arrangements that are satisfactory to the City and sufficient to assure their
48 maintenance and preservation for the purposes intended. Covenants or other legal
49 arrangements shall specify ownership of the common open space and common
50 improvements, method of maintenance, responsibility for maintenance,
51 maintenance taxes and insurance; compulsory membership and compulsory

1 assessment provisions; guarantees that any association formed to own and
2 maintain common open space and common improvements will not be dissolved
3 without the consent of the City, and other specifications deemed necessary by the
4 City.

- 5
6 3. All subdivision of property containing common lots, open space and common
7 improvements shall be considered a subdivision and subject to review in
8 accordance with the provisions of the Subdivision Regulations.
9

14 accordance with the Condominium Property Act, Chapter 448, Missouri State
15 Statutes.
16
17 2. Platting. A condominium plat must be submitted for review in order to create a
18 condominium ownership arrangement. The plat may be reviewed following the
19 minor subdivision process if five (5) or fewer units are proposed; otherwise the plat
20 must be reviewed following the final plat review process.
21
22 3. Condominium plat covenants. Any restrictive covenants, rules and by-laws of the
23 ownership unit, as prepared in accordance with Chapter 448, Missouri State
24 Statutes, shall be approved by the City before any final plat is recorded. The
25 covenants and restrictions shall provide:
26 a. For the establishment of the condominium or homeowners association or trust
27 prior to the sale of any property;
28 b. For the method of maintenance;
29 c. That open space restrictions and maintenance shall be permanent;
30 d. That the homeowners are liable for the payment of maintenance fees and
31 capital assessments;

35 and perpetual maintenance;

44 private restrictive covenants.
